

Hankook Belcar Tire technical datas

Belcar 1 - Protos (Norma, Radical)

		Front	Rear
Recommended Inflation (20°C)	Cold	1.15~1.30	1.05~1.25
Min Pressure (bar) *	Hot	1.65~1.85	1.55~1.85
Recommended Camber **		-2.5~3.5	-2.0~2.5
Optimum working temperatures		70-100deg	80-100deg

Belcar 3 - Belcar Specials (Silhouette, Marc Cars, Lambo)

		Front	Rear
Recommended Inflation (20°C)	Cold	1.40~1.45	1.35~1.40
Min Pressure (bar) *	Hot	1.90~2.00	2.00
Recommended Camber **		-3.0~3.7	-2.0~2.7
Optimum working temperatures		70-100deg	80-110deg

Belcar 4 - GT4

		Front	Rear
Recommended Inflation (20°C)	Cold	1.40~1.45	1.30~1.35
Min Pressure (bar) *	Hot	1.90~2.00	1.90~2.00
Recommended Camber **		-3.5~4.0	-2.7~3.5
Optimum working temperatures		70-90deg	80-100deg

Belcar 5 - Belcar Sport (Lamera, 235i, TCR)

		Front	Rear
Recommended Inflation (20°C)	Cold	1.45~1.50	1.40~1.60
Min Pressure (bar) *	Hot	2.00~2.10	2.00~2.20
Recommended Camber **		-3.5~4.0	-2.5~3.5
Optimum working temperatures		80-100deg	80-100deg

Belcar 6 - Belcar Club (325i, GT86, Clio)

		Front	Rear
Recommended Inflation (20°C)	Cold	1.50~1.55	1.45~1.65
Min Pressure (bar) *	Hot	2.00~2.10	2.00~2.20
Recommended Camber **		-3.5~4.0	-2.5~3.5
Optimum working temperatures		80-100deg	80-100deg

Wet tires:

General 0,2 bar higher (cold pressure)

If warming up poor, do not hesitate to raise up the pressure

Recommendation to drive at least same target pressure as slicks

* minimum pressure

** maximum camber recommended

for spa races go for minimum camber recommended

All values depending on racetrack, ambient conditions and in case of wet tyres of the amount of water.
